

I am against any rule changes by FCC to increase corporate control of media. Allocation of public airways and news media outlets was supposed to include a wide range of information with a great diversity of opinion to inform the people of what was going on in our society, so voters could make more reasonable decisions. That is a basic principle and an absolute necessity in any democracy to be a functional system. With the current relaxed FCC rules, we have seen corporate muscle used to foster wars of aggression, fear in the people, and suppression of opposition viewpoints. Do not revise/ relax the rules ANY MORE!
